RUBBER TRACK BENEFITS

WEP offers appropriate distribution facilities to ensure timely availability of rubber tracks and aftermarket parts for the construction and allied industries.

REINFORCED EDGES

Track edge designed with thicker rubber between lugs reduces edge slicing; this allows for longer operating life.

SHORT PITCH DESIGN

Short pitch technology provides longer track life, reduced vibration and reduced wear and tear on undercarriage parts.

JOINT-LESS TECHNOLOGY

Joint-less steel cable technology guarantees increased tensile strength of the track.

DURABILITY & FLEXIBILITY

Advanced natural and synthetic rubber blending technology provides superior flexibility and resistance to abrasion.

"GUARANTEED TO FIT RIGHT"
